

Robert Andrew Elliott

Accessibility Engineer | WCAG 2.1 AA | Section 508 | Front-End Development
Nashville, TN • 615-669-5552 • andrew@aedevedesigns.com • linkedin.com/in/andrew-elliott-dev

PROFESSIONAL SUMMARY

Accessibility Engineer and front-end developer with 7+ years building and remediating WCAG 2.1 AA and Section 508 compliant web applications across enterprise, agency, and healthcare environments. DHS-certified Trusted Tester combining hands-on engineering (React, TypeScript, Node.js) with manual assistive-technology testing (JAWS, NVDA), automated auditing (axe-core, WAVE, Playwright), and PDF/document remediation. Built React- and Claude API-powered accessibility tooling that operationalized auditing and training at enterprise scale. Translates complex WCAG and ARIA requirements into actionable, defensible engineering guidance.

CORE SKILLS

Accessibility & Standards: WCAG 2.1 / 2.2 AA, Section 508, ADA Title II & III, ARIA / WAI-ARIA APG, VPAT / ACR authoring, WCAG2ICT, remediation, accessibility audits, assistive technology testing

Assistive Technology: JAWS, NVDA, ANDI, screen reader and keyboard-only navigation testing

Engineering: JavaScript (ES6+), TypeScript, React, Node.js, Express, HTML5, CSS3/SCSS, Vue.js, jQuery, MongoDB, REST APIs, responsive design, performance optimization, Git

Auditing & Tooling: axe-core, WAVE, Lighthouse, Siteimprove, Playwright, automated CI accessibility pipelines, Claude API / LLM integration

Documents & CMS: PDF remediation, document accessibility (tagging, reading order, alt text), WordPress, Drupal, Moodle

Collaboration: Cross-functional accessibility advocacy, developer training, technical writing, Agile workflows, Jira, Asana, Monday

PROFESSIONAL EXPERIENCE

Principal Accessibility Developer

Mar 2022 – May 2026

Dell Technologies — Accessibility Center of Excellence

- Designed and delivered an enterprise-wide WCAG 2.1 AA training curriculum adopted by cross-functional developer and content teams, establishing consistent accessibility governance standards at scale.
- Built React-based accessibility education and tooling that enabled self-service compliance learning across distributed teams and reduced dependence on manual review.
- Conducted comprehensive manual accessibility audits using JAWS, NVDA, and ANDI, validating real-world screen reader and keyboard-only navigation and producing prioritized, actionable remediation reports.
- Operationalized an automated accessibility scanning pipeline with axe-core, WAVE, and Siteimprove; used audit data to prioritize remediation backlogs, track compliance trends, and demonstrate measurable progress to stakeholders.
- Served as subject-matter expert and internal accessibility consultant, partnering with product, design, and engineering to integrate WCAG and ARIA requirements early in the development lifecycle and reduce costly late-stage remediation.
- Owned accessibility software projects end-to-end, including a vendor recommendation matrix relied on by content teams across Dell and the team's internal accessibility training platform.

Senior Software Engineer – Accessibility

Dec 2021 – Mar 2022

TEKsystems — Contract

- Applied WCAG 2.1 AA standards across web applications and contributed to accessibility testing and remediation efforts ahead of permanent placement at Dell.

Front-End Engineer

Aug 2021 – Nov 2021

ISSA — Contract

- Developed and maintained the public-facing ISSA platform using SCSS, jQuery, and HTML5, focused on conversion, mobile responsiveness, and WCAG accessibility compliance.

Front-End Developer

Aug 2019 – Nov 2019

BOHAN — Nashville, TN

- Built and launched standards-compliant front-end solutions for multiple client websites, translating business requirements into functional features under tight timelines.
- Ensured agency digital deliverables met WCAG 2.1 AA standards, conducting usability reviews across browsers and assistive technologies to validate compliance before client handoff.
- Identified and resolved code and database issues through structured QA testing, reducing bug counts and stabilizing production environments before launch.

Web Content Specialist – Accessibility

Aug 2018 – Aug 2019

Hospital Corporation of America (HCA Healthcare)

- Remediated WCAG 2.1 AA compliance gaps across the HCA Healthcare site portfolio using HTML, CSS, and JavaScript, ensuring patient- and staff-facing content met ADA standards.
- Developed an organizational accessibility and plain-language style guide governing web standards across HCA's digital properties, providing a repeatable framework that reduced inconsistency and accelerated compliant content production.
- Contributed front-end code to web applications, implementing accessible, ARIA-conformant UI components that met both functional requirements and WCAG standards.

CERTIFICATIONS

- **Trusted Tester Certification** — U.S. Department of Homeland Security (DHS), 2026 • Credential ID: TT-2604-08953
- **Responsive Web Design Certification** — freeCodeCamp, 2019

EDUCATION

- **Full Stack Web Development** — BloomTech (2020–2022). JavaScript, React, Node.js, and computer science fundamentals.
- **Front-End Development** — freeCodeCamp. Responsive design, web accessibility, HTML5, CSS3, JavaScript, React, Redux, Node.js.
